

BEXTRA BY TARTER

THE PROVEN, MONEY-SAVING ROUND BALE HAY FEEDER FOR CATTLE.

- **SAVE MONEY & HAY:** Oklahoma State University researchers discovered Bextra's modified cone feeder design increased hay savings, keeping hay waste below 6 percent.
- **UNIQUE DESIGN:** It prevents cattle from eating off the top of the bale and throwing it onto the ground, where it will inevitably go to waste. The Bextra centers the hay bale so cattle eat inside the ring and a solid-sheeted hay saver prevents them from tossing hay outside the feeder.
- **TARTER TOUGH:** The Bextra feeder is built Tarter Tough for extended life in the elements with its durable powder coat finish.
